DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. William B. Batzer on October 25, 2004.

The application has been amended as follows:

Page 7, line 2 of the Specification, replace "compressive" with "compressive"

In claim 1, line 17, "produce" has been deleted and - - fail, producing - - has been inserted before "debris"

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The primary reasons for the allowance of the claims is the inclusion of the limitations of a method of predicting the failure of a rock formation surrounding a subterranean cavity including the steps of employing a measuring/employing a set of parameters to determine a rock strength, determining two characteristic lengths, one of which being related to the 'grain size' of the rock formation to determine a correction factor for the rock strength and predicting failure of the rock formation

Art Unit: 2856

based on a failure criterion, typically exhibiting debris production. While the Prior Art speaks of stress/failure predictions in subterranean cavities (i.e. boreholes, wellbores) (see Prior Art reference "Influence of Composition and Texture on the Failure properties of Classic Rocks" by Plumb), none of the Prior Art teaches the employment of a characteristic length related to the 'grain size' of the rock formation in calculating failure stresses or failure conditions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reiffsteck, Cooley et al., Tang et al., Plumb et al., Fontenot, Dusterhoft and Ong et al. all teach various aspects of the instant invention.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fitzgerald whose telephone number is (571) 272-2843. The examiner can normally be reached on Monday-Friday from 7:00 AM to 3:30 PM.
